South of England, Year 6 Award Winner

Name:
Dylan Raybould

Gender:
Male

School Name:
Beech Grove Primary School

Year Group:
Year 6

Which engineer inspired you?
Leon Horsfield

What company does your engineer work for?
Balfour Beatty

Dear engineers

My name is Dylan and I hope to tell you how my invention can help some of the better.

My invention can solve the problem of losing EPI pens and meters and if you do lose it it will tell you where it is.

Because they lose them and miss the injection that's possible and it could hurt to you. How about?

The same solution is that you can't always lose the EPI pens and meters.

My invention will help people who are diabetic and who need it for their injection.

The reason it should be built is because not all these people who are losing their EPI pens and meters and sometimes it could hurt and be hard because they put it in when they are having it.

My solution is special because it is simple and people who are losing it could use it and be happy.

I was inspired because my sister has diabetes and I hope that you will use it and be happy.
