

IF YOU WERE an **ENGINEER** WHAT WOULD YOU DO?®

**Central England Leaders Award 2019
Winner, Year 1**

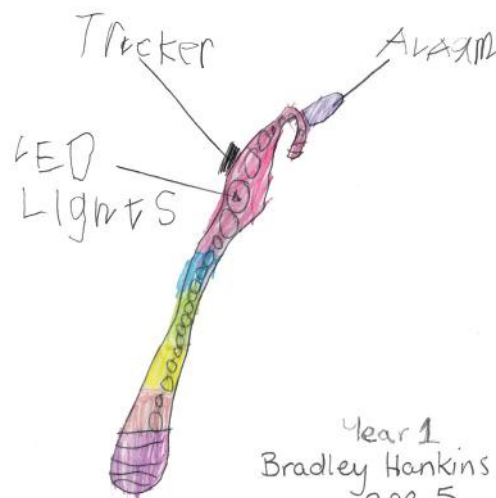

Light Stick

Alarm to call out for help

My invention is to help people who are elderly or blind to be seen clearly when crossing the road. It's in the shape of a walking stick and has LED lights so the person can be seen. It also has a tracker in case the person is lost or injured.

Bradley Hankins

Walking stick to help the elderly

LED Lights so they person can be seen
Tracker so the person can be found if lost or injured
