

IF YOU WERE an ENGINEER WHAT WOULD YOU DO?®

SCOTTISH ENGINEERING LEADERS AWARD 2019: National Winner, Secondary 2

Metal Straw

The straw will solid up so you
can put it in your pocket. It will
kind of look like this but is yours had a better
idea you can change it. I was thinking
end a metal wire could connect the
bits to gether with metal wire or magnets.

Name: Scott Coulter
Gender: Male
School name: St. Matthew's Academy (Saltcoats)
Year group: Secondary 2
Which engineer inspired you? Nigel Akam, Chris Cromack
From which company? EDT Scotland

'The Metal Straw' as a solution to plastic straws and their impact on the environment. This design, made from metal easily collapses and can be kept in your pocket.
