needle /  
Syringe

← needle  
hidden  
within  
plastic  
cover

Personalised  
covered  
needle / syringe

Name:	Bo Joynson
Gender:	Female
School name:	Newcastle High School for Girls Junior School
Year group:	Reception
Which engineer inspired you?	Louise Shaw
From which company?	Trains Engineer Europe

This clever but simple device is ideal for children, or adults, that are nervous about receiving injections. The needle is masked within the cover chosen from a range of options from heroes to animals and the syringe and needle are not seen whilst the injecting of medicines is performed. The recipient can leave with the cover as a keepsake.
