

(not to scale)

Problem: Pollution in the ocean and on land (Plastic.)

Solution: Habtech drone and plastic moulder

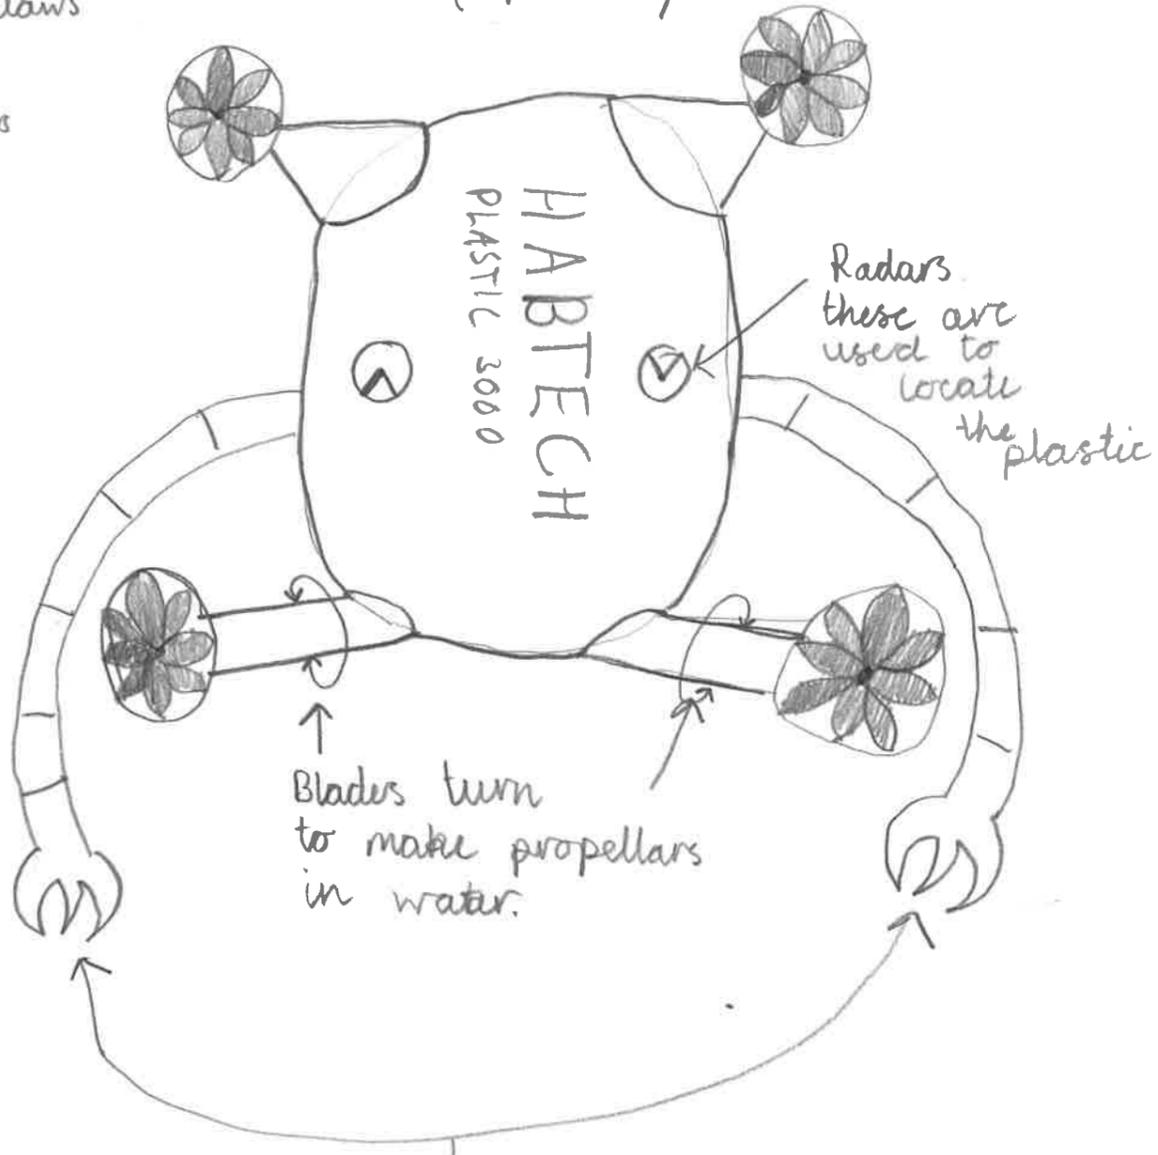

Dispenser and cutter and cooler  
Cuts off any excess plastic then dispenses the product. It is also cooled.

Moulder.  
The plastic is now moulded into a certain shape ready to be dispensed.

Materials:  
Titanium  
Metal claws  
Wires  
Oren  
Batteries

Habtech Drone (top view)

Plastic grabbers collect the plastic and reels it in

Heater  
The plastic is heated until it is mouldable. It is then sent to the moulder.

All plastic cut-offs go in here.

Steriliser  
The plastic is sterilised ready to be re-modelled into something else.
